About This Game

Exterminator takes place inside a Japanese Game Show, and you are the contestant!

The objective is to take down the mischevious mice from all directions.

This is a game where you can relieve stress and get a workout at the same time! This is what Exterminator is all about.

The rules are simple. The goal is to punch out as many mice as you can within the time limit to earn points.

Strive for the top ranking while getting a nice sweat.

Anyone can enjoy a refreshing experience playing Exterminator!

Mouse Collection

There are many types of mice, each brining their own unique personalities.

Defeat them to collect their card. Try and collect them all!

Title: Exterminator
Genre: Action, Casual, Sports
Developer:
PRIME WORKS Co.,Ltd.
Publisher:
PRIME WORKS Co.,Ltd.
Release Date: 5 Apr, 2017

b4d347fde0

Minimum:

OS: Windows 7

Processor: Intel i5-4590 / AMD FX 8350

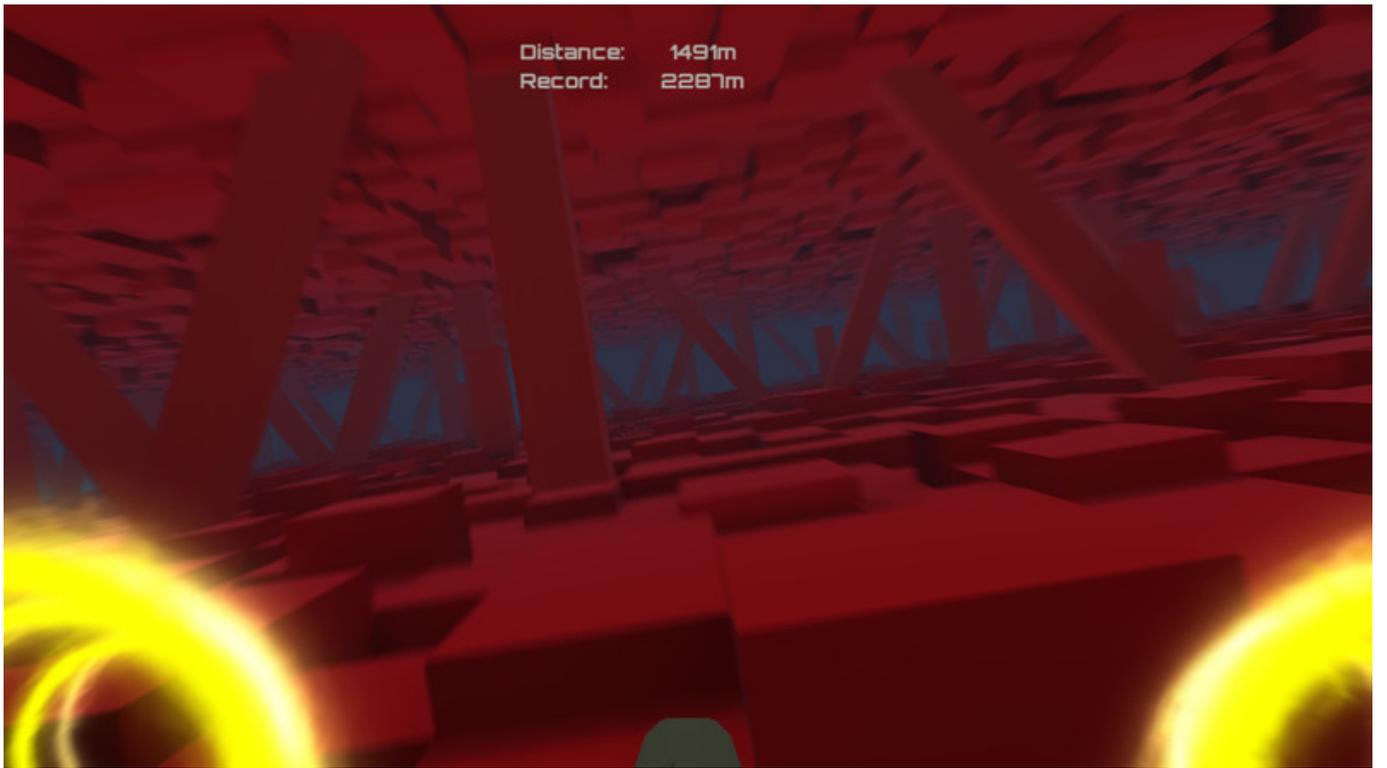

Memory: 4 GB RAM

Graphics: NVIDIA GeForce® GTX 970 / AMD Radeon™ R9 290

Storage: 7 GB available space

English

I found about the game on EVW's channel, I saw a sneak peak of the game and thought it may be a fun quick platformer.

It is deffinetly a really fun, quick paste, very nice music platformer.

Really enjoyed it and if you are thinking of buying this game deffinetly buy it.

1. Really cheap for how good it is.
2. Really fun.
3. Challenging
4. Very unique. Nidhogg with guns and trams.

10V10. They say "40-50 hours of content".
I'd say they lied.

Nene best waifu.. OK so... the gameplay itself is pretty fun, but not \$13 worth of fun. The puzzles are either really easy or tricky in a frustrating, not challenging way. But the thing that really got me was the dialogue. There was SO MUCH DIALOGUE. I didn't feel invested in any of the characters and I think having this much dialogue, no option to skip, and actually being forced to wait while the characters "text" each other is absolute overkill. It felt like the game was essentially brief runs of phone-game level play between lines and lines and lines of dialogue. I will say, the graphics were really nice.. I'm so excited that this game exists again! The implementation is clearly a little rough (you can tell right away from the menus), but the developers seem to have captured everything that was awesome about the original game and added a bunch of great new content.. bad game Omg, this game is amazing! Such good puzzles MMMMMMMMM, I WISH I WENT TO THE SAME SCHOOL. ooh wee ooh i look just like buddy holly. Duel stick fun! Not really a deep game, but it's fun.

I saw all the positive reviews and was looking forward to a cute Halloween-themed game, but unfortunately the characters just weren't compelling enough for me to enjoy it. The puzzles were all right, but the ending was disappointing and overall it was kind of a lackluster story experience. It wasn't awful by any means, just... mediocre.. There are a lot of really well made hidden object games available on steam. This...is not one of them.

Not only is it strung together by nothing even remotely resembling a coherent story but the hidden object puzzles themselves (of which there are MANY) are pretty awful. The same objects are repeated a lot, many are misspelled or completely the wrong word for the object (clocks are called "watches" throughout). The other puzzles in the game are more of the same of the type of thing you see in these games and are often even repeated two or three times to pad things out a bit.

It's also (mercifully) very short but ends on...something? I hesitate to call it a cliffhanger because that would suggest they leave it somewhere that makes you want to return later for a sequel. This is not the case.

If your after a decent Hidden Object game I'd look elsewhere. There's plenty of good ones on Steam and this one is REALLY not worth your time.. Skibbity bap skibbity boop +1 for boobs. A collection of three short visual novels (the third one being just three minutes long!) that are all slightly different permutations of the same story. It's not a bad use for a buck! I wouldn't mind reading something like a polished full-length final draft in the future.

My favourite trick was when one of the stories adapted a game over into the framing device: how *does* a dead storyteller tell you a story?. p -- :0
