
The Wire is a casual puzzle game with plenty of levels, which is designed to suit the needs and abilities of players of all ages. Play with the electronic background music, you just need to move the controller to go forward. The most important thing is making sure it is going on the track. To win a level, you just need to reach the end point before time up. That's it. We hope you guys enjoy it as much as we do!

Game start:

Put the joystick in the start ring?Rings become green, the game begins

Game over?

time out?

joystick touch the track?

Before or after the end of the joystick?Out of the track plane

?When the current side shows red?Means that you have entered a dangerous distance

When the current side shows blue?safety?

Track height adjustment?

The visual height can be adjusted by the touchpad up and down key?

Integral calculation?

Basic points per level?

According to the remaining time statistics score?

Follow up development plan?

We'll add more levels.

We will adjust the level length?so that smaller users can also play the game?

We will increase the network based scores?so that you can see your ranking?

We'll add a simple pattern?So that you can start the game from the middle of the circuit after you lose?Simple mode integration will be different from the ordinary mode??

We will increase the network to fight?We will increase the network to fight, so that you and your friends to a game?

WIEEEEEERD

. So. This game looked quite good at first glance, but its actually terrible. The sprite work is good, the enemy design is interesting and kinda fresh, very well done. The battle system is neat too, but the real problem is the story. Its written horrendously. They repeatedly forget to capitalize the beginnings of sentences and the story makes no sense. Dystopia is a very interesting genre with a lot of interesting different potential facets. This game has none of that. Spoilers ahead to the story, I'll try to keep it limited by to explain the issues with the story I need to, you know, talk about the story. The main character, Rourke, is sent on a mission in Poland and finds out he's really purging a bunch of civilians. He then tells the first person to listen that he can't POSSIBLY live this kind of life, and that he's gonna desert even if it gets him executed. What the ♥♥♥♥ man, who does that. Now, going through a panic attack after you found out you murdered a bunch of innocent people is totally reasonable, but who the ♥♥♥♥ would tell someone that. Its insane. You'd have to really think about it, mull it over and THEN decide to bail on your country. Not only that but the dialogue people have is weird and stilted, they don't talk like real people they talk like someone is trying to beat me over the head with the tragedy of war or some nonsense.

TL;DR most of the game is good, but the story sucks♥♥♥♥♥ and an RPG with bad story is pretty much worthless.. Nice game, definitely worth trying!. If like puzzle games (especially sudoku) is worth a try.

The story is really sucking me in and the atmosphere is incredible (even tough it's just music and a computer screen...)

really cool, and for the price is a steal.. Yep, pretty much brilliant.

Graceful Explosion Machine is - if you'll excuse the superlative - easy to play, difficult to master. I'm about half an hour in and already, I want to master every level for that elusive S+ rank, playing perfectly without getting hit or breaking the multiplayer.

Thankfully, the game controls buttery-smooth and weapons are all a joy to use, so every failure not only feels like your own fault but also encourages you to pick the pad up and start playing again. There are those who'll play Graceful Explosion Machine just to get to the end, and they'll certainly get their money's worth; but those who truly want to excel will find plenty of reasons to return and climb the scoreboards. The game's short levels make this perfect for arcade enthusiasts, and whether you play for half an hour or half a day, whether rushing to the end or mastering every level, this is one of those excellent games that gives back as much as you're willing to put in.

Those looking for a deep storyline and rich characterisation will have to look elsewhere, but to expect that from Graceful Explosion Machine would be missing the point; this is a respectful modern take on the twitch arcade gaming of yesteryear, and in concentrating purely on its gameplay it offers a tight and addictive experience.

Oh, and the music is lovely.. This is not good. Dated graphics, couple of crashes, very short and quite bad gameplay really. Heavy Fire: Afghanistan was better and was actually quite fun, if I remember correctly. It almost feels like this was made before that one, maybe it was, who knows.. Shoot the ball into the ever advancing line of balls to match colors and prevent the line from reaching your end.

There's powerups, bosses and a lot of exploding colorful balls.. Great and very typical hidden object game.

Introduces 2 new things:

- a second character you can take over
- extra dialogue with second character

Evolution !!

. The AI cheats and the game is designed in way the player is almost always disadvantaged.

A couple of examples:

- At the beginning of the fight the player's army has always a lesser amount of "moral" than the opponent; ironically is possible lose the clash due to the low level of moral even in the case the player's army has more soldiers and fewer loss jsut because the enemy runs all over the map.

Furthermore the the player starts always in a worse position on the map.

- AI has a better food/gold ratio of production

Basically AI plays with different rules than player. The DLC "Saxon campaign" introduces some improvements about diplomacy, army mangement etc. but the problems stated before stay.
